Dear Families,

With the school year quickly approaching, we wanted to provide you with an update on the online learning platform for the beginning of the school year.

In the beginning of August, Hope Hall started the process of registering with Google so that we can use Google Classroom. Google is required to verify that Hope Hall is a school. This is a step that must happen for all schools utilizing this online learning platform at the start up. At this time, Google has still not verified that we are a school. We have been in contact with Google on several occasions and there is currently an influx of requests and it is taking longer than expected.

So, while we are waiting for approval, we are going to start the school year by using the Student Portal through Praxi. Teachers will be able to post links, assignments and meeting invites to Zoom in this space for students to access. Students and teachers will also be able to message each other directly for support.

Next week, you will receive an email with your child(ren)'s log in information and steps to take so that you and your child(ren) know where to view information from the teachers.

Once we get approval from the Google, we will be training the students on Google Classroom and then be switching over to that platform. Included in that will be parent training videos if you want more information and steps to see if your child(ren) have been accessing their work.

Thank you,

Covid Safety Planning Committee
